

Jim Mileski

E-mail testimonial from a customer 11/14/01

Comments: I am just a regular homeowner of a 1901 late Victorian. In the stairway going to the finished attic, there is not enough headroom for any kind of insulation. I gave the ceiling and walls 2 coats of paint with Thermilate, and the difference is really phenomenal. Thanks for making such a useful and affordable product. I've ordered 5 more containers and can't wait to start painting more!
