1. Further to the document number [Construction (E) 8124- 30698(dated 23 Aug 2002)].
2. It had been notified that a test would commence on anti- condensation ceramic powder to improve condensation on walls and ceilings in the balcony area.

However the area and site pre- determined for the test has now been changed to the following due to the fact that move- in of the tenants to the 54th block at Ansan Gozan site became unattainable.

We therefore urge you to note the following changes and ensure that the products concerned are promptly supplied.

We would also appreciate your support in the form of supervising and advising during the test to ensure that the test is efficiently carried out.

1) Test Site

Previously notified	Changed
54 th Block at Ansan Gozan (the 8 th Site)	2 nd Block at Ansan Gozan (the 5 th Site)
56 houses (units) out of 267 houses (All units of Block 1002)	77 houses (units) out of 940 houses (All units of Block 1318)

2) Test Area

- Internal/external walls and ceiling in front & rear balcony (26 units, 1- 9th floor)
- External walls in front & rear balcony (27 units, 1- 9th floor)
- Internal walls and ceiling in front & rear balcony (24 units, 10- 13th floor)
