

Mrs. P Bullock

---

To Thermilate,

I received the package of Thermilate, which was used on my kitchen ceiling. The kitchen is 15ft x 12ft x 9 ft high and previously had polystyrene tiles. Your product seems to do what it says, by reflecting the heat back into the kitchen. I have been monitoring the temperature and I would say that Thermilate has been a good solution to the removal of the polystyrene tiles.

Thank you once more

From Mrs. P Bullock
